

Er. Maharshi G. Shukla

Data Scientist · Machine Learning · Analytics · Team Leadership · Available for Opportunities

 iamshuklamaharshi@gmail.com  +91 92658 96174  [WhatsApp](#)  [LinkedIn](#)  [GitHub](#)  [Portfolio](#)  [HuggingFace](#)  Ahmedabad, India

SKILLS

Languages: Python · SQL

ML Libs: scikit-learn · XGBoost · LightGBM · CatBoost

Deep Lrn.: PyTorch · TensorFlow · Keras

NLP & Viz: HuggingFace · BERT · Word2Vec · NER · LLMs

Analytics: EDA · Hypothesis Testing · A/B Testing · Bayesian · SMOTE

BI & Viz: Power BI · Tableau · Matplotlib · Seaborn

Tools: Git · Streamlit · Excel (Adv.) · AutoCAD

EDUCATION

Data Scientist & AI Engineering

Datamites Institute

IABAC & NASSCOM · 2024-Ongoing

B.E. Electrical Engineering

AIT – Gujarat Technological Univ.

CGPA: 6.09

CERTIFICATIONS

IABAC – Data Science & AI

NASSCOM – AI Engineering

LANGUAGES

English · Gujarati · Hindi

CORE STRENGTHS

- End-to-end ML pipeline design
- Imbalanced data handling
- Statistical & causal analysis
- Data storytelling & BI
- Model deployment (Streamlit)

PROFESSIONAL SUMMARY

Recently certified Data Scientist (Datamites — IABAC & NASSCOM) with ~5 years of professional experience. Completed the DS phase of internship at Rubixe — 4 DS capstone projects (all deployed or deployment in progress) and 1 active DS client project involving highly imbalanced credit-risk data. Proficient in scikit-learn, XGBoost, LightGBM, SMOTE, Power BI, Tableau, and Streamlit. Seeking a Data Scientist role to drive measurable business impact through rigorous, production-ready ML.

EXPERIENCE

Data Science & AI Engineering Intern · Current

Rubixe Jan 2026 – Present

- ▶ DS Phase: Completed 4 DS capstone projects — Walk-Run Classifier, Texas Salary Predictor, FIFA 20 Clustering & Handwritten Digit Recognition (all deployed or deployment in progress).
- ▶ DS Phase: Actively working on Bank GoodCredit client project — predicting credit card defaulters on highly imbalanced historical data using SMOTE, cost-sensitive learning & ensemble methods.
- ▶ AI Phase (Upcoming): 4 AI capstone + 1 AI client project — next internship phase covering AI Engineering.

Team Leader

TTEC India Pvt. Ltd. Mar 2025 – Dec 2025

- ▶ Designed Power BI & Tableau dashboards; tracked agent KPIs and presented insights to management.
- ▶ Applied trend analysis to forecast team metrics; improved output via QA audits and coaching plans.
- ▶ Led ~15-member team: scheduling, escalations, shift planning & cross-functional SLA compliance.

Sales Executive

TTEC India Pvt. Ltd. 2024 – Mar 2025

- ▶ Managed US client sales pipeline: lead qualification, quoting, upselling, closure & CRM upkeep.

Office Executive

MAS Solutions 2022 – 2023

- ▶ UK ops support: live corrective maintenance (chat), engineer diary management & Excel tracking.

Design & Production Engineer

Technotherm Automation 2019 – 2022

- ▶ End-to-end control panel production; 2D/3D machinery design & wiring diagrams via AutoCAD.

PROJECTS

Internship DS Phase — Client Project

Bank GoodCredit  In Progress

Predicting credit card defaulters on highly imbalanced historical data. Applying SMOTE, cost-sensitive learning & ensemble methods to maximise recall on the minority (defaulter) class.

Stack: Python · scikit-learn · SMOTE · XGBoost · LightGBM · Imbalanced-learn

Internship DS Phase — Capstone Projects (4/4 Completed)

Texas Salary Prediction  Completed  [Live Demo ↗](#)

Regression model predicting salaries across Texas regions; feature engineering, outlier treatment & ensemble tuning.

Stack: Python · XGBoost · LightGBM · GridSearchCV · Streamlit

Walk vs. Run Activity Classifier  Completed  [Live Demo ↗](#)

Binary classifier on wearable accelerometer & gyroscope sensor data with time-series feature engineering.

Stack: Python · scikit-learn · Random Forest · SVM · Streamlit

FIFA 20 Player Selection & Clustering  Completed  [Live Demo ↗](#)

K-Means clustering on player attributes for role-fit profiling and squad optimisation.

Stack: Python · scikit-learn · K-Means · Pandas · Streamlit

Handwritten Digit Recognition — MNIST  Completed  [Live Demo ↗](#)

CNN for 0–9 digit classification; conv, pooling & dense layers with regularisation.

Stack: Python · TensorFlow · Keras · CNN · Batch Normalisation · Dropout

Internship AI Phase — In Pipeline

4 AI Capstone + 1 AI Client Project  In Pipeline

Upcoming AI Engineering phase: 4 AI capstone + 1 AI client project — NLP, LLMs & AI Engineering.

Stack: Python · HuggingFace · Transformers · LangChain · NLP · LLMs

Independent Project

Netflix Content Recommendation System  Completed

Self-initiated recommendation engine using TF-IDF vectorisation & cosine similarity.

Stack: Python · Pandas · scikit-learn · TF-IDF · Cosine Similarity
